

**AMENDMENTS TO THE DRAWINGS**

Please amend FIGS. 21b and 21c. A replacement sheet reflecting the changes made to FIGS. 21b and 21c is attached to this Amendment as Appendix A.

**REMARKS**

Reconsideration of the application, as presently amended, is respectfully requested. Claims 1-5 have been canceled. Claims 6, 14, 16-18, and 20 have been amended. No claims have been added. FIGS. 21b and 21c have been amended. Applicant respectfully submits that no new matter has been added.

Claims 1-5 stand rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,929,825 to Niu, et al. ("Niu"). Claims 1-5 have been canceled, rendering the rejecting thereof moot. Claims 6-20 have been allowed. Applicant has amended claims 6, 14, 16-18, and 20 to address antecedent-basis issues.

As noted above, Applicant has amended FIGS. 21b and 21c as reflected in the replacement sheet attached as Appendix A. Applicant respectfully submits that FIGS. 21b and 21c have been amended to be consistent with FIG. 21a. As noted in the application as originally filed, FIG. 21a is a perspective view of conductors of a double-sided double-surface antenna 310, while FIG. 21b is a view of the front of the double-sided double-surface antenna 310 including a substrate 318, and FIG. 21c is a back view thereof.

As is apparent from FIG. 21a, a transverse width of a plane 324 and a conducting plate 316 is the same as a width of a space-filling or grid-dimension section 320 of the antenna 310. However, in FIG. 21b prior to its amendment herein, a visible portion of the plane 324 in the front view shown in FIG. 21b is indicated to be wider than the width of the space-filling or grid-dimension section 320. In similar fashion, in contrast to FIG. 21a, in FIG. 21c the conducting plate 316 is shown as approximately the same width as the substrate 318.

Applicant has therefore amended FIGS. 21b and 21c to reflect that the width of the plane 324 is the same as the width of the space-filling or grid-dimension section 320, as is shown in FIG. 21a. Applicant respectfully submits that the amendment to FIGS. 21b and 21c herein are being made merely to correct an error in FIGS. 21b and 21c as filed and to make FIGS. 21b and 21c consistent with FIG. 21a. Applicant respectfully submits that no new matter has been added by the amendment to FIGS. 21b and 21c made herein.

In view of the above amendment, Applicant respectfully submits that the present application is in condition for allowance. A Notice to that effect is respectfully requested.

Dated: April 9, 2008

Respectfully submitted,
